## **ELECTRICS QUICK GUIDE**

This is a guide, designed to assist exhibitors plan their power requirements for their stands. Please contact us if you require any additional help & information. The sockets we provide, have different power ratings. Below is a guide which shows the sort of equipment that can be use with each:

### **1kw (is approx 4.5amps) suitable for:**

**A small domestic coffee machine (750w - 1kw)**  
**Vacuum cleaner (800w - 1kw)**  
**One computer**  
**Mobile phone charger**  
**TV / Video**

### **3kw (is rated at 13amp) suitable for:**

**Kettle (2kw-3kw)**  
**Catering coffee machine (upto 3kw)**  
**Industrial cleaner (upto 3kw)**

The above list is a guide only and indicates individual items that can be used with each socket. The use of more than one item with one socket is not acceptable. At most venues the use of extension cables and sockets is not allowed.

Actual power requirements will vary, dependent upon the equipment being used. All electrical equipment carries information showing its power consumption in KW or watts. It is the exhibitor's responsibility to check their own equipment before ordering.

Onsite if the socket you have ordered is overloaded the fuse will blow. You will be required to pay for the socket to be uprated according to the power that you are using. The socket will not be re-energised until the problem has been rectified. This can cause delays during the build up, to your stand and other exhibitor's located next to you.
